

LanguageLab is a professional language lab that gives teacher the necessary tools for the management of a professional language laboratory easy to use.

- The ideal configuration of the teacher's workstation is with two displays, one for pedagogical use and for capturing the screen of the students and the secondary (optional) for the management of the lab.
- If positioned in the secondary display, set in extension of the primary, the graphic interface, allows the teacher a permanent view of the activity of students in their thumbnails and the command buttons.
- LanguageLab transmits the contents of the teacher's screen to the class with perfect fluidity, ideal for showing videos, even from YouTube while the teacher watches them in streaming. The teacher's voice is superimposed on the soundtrack for live comments.
- The audio functions are managed by buttons with explicit names (COM, ALL, LISTEN, CONF, etc.).
- You can add/take away other students from the conversation of teacher with a student, simply by clicking on a button in the icon of each one.
- LanguageLab has 16 audio groups, pairing and interpretation.
- Teacher and students can record conversations between themselves.
- It allows the teacher to open/close a website on students.
- Roll Call allows to display student names under their thumbnails.
- The teacher also manages the functions: quiz, chat, file transfer, launch of apps on students.
- Instant Lock/unlock of Internet and Black and White List of sites.
- Audio Active Comparative recorder is complete of 4 courses.
- All the features can be applied on one, a group or the whole class.

LanguageLab allows teachers to use their digital learning resources to help manage student activity in a dynamic and exciting interactive environment.

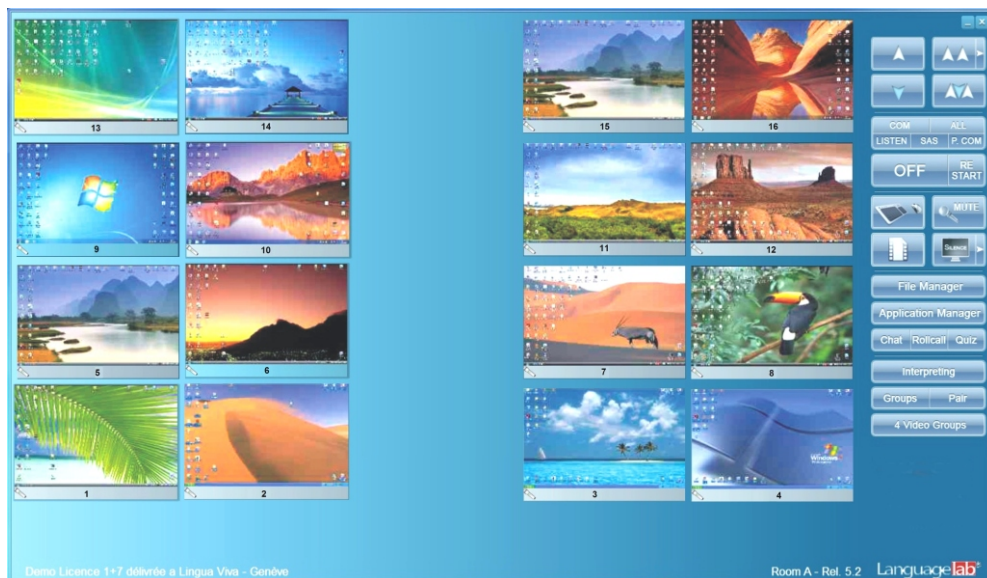

It makes easy for teachers to launch applications and assignments to students, upload session files for guided learning activities, monitor student screens for support and collaboration, and even direct use of the Internet for managed web-based learning activities. All functions are executed by buttons with explicit names.

The graphical interface is simple and complete, showing the thumbnails of the students in a map of the classroom.

In case of domain, the account names are automatically shown in the icons of its students.

The audio functions are the typical linguistic functions: ALL, COM both private and public, LISTEN, CONF, student as teacher, groups, pairing, interpreting.

Movies from DVD, USB and Internet are broadcast to class as live content on the teacher's screen while he is watching it, with perfect fluidity even to Windows tablets connected via Wi-Fi.

LanguageLab is equipped with **TeachRecorder**, a full comparative audio recorder for .wav and .mp3 file formats. His panel shows, the buttons for managing Master and Student tracks, the counter of bookmarks, the read/write text boxes and the buttons for simultaneous features (blue buttons).

Teach Recorder can be started on students by teacher, already loaded with an audio exercise ready to be played.

The program allows the creation of series of audio/text quizzes.

The questions can be oral and / or written and the answers can be written and / or oral, in all combinations.

Other commands are for self-start of recording at the end of listening of a bookmark, for simultaneous translation and for simultaneous and sequential playback of the two tracks of the bookmarks.

LanguageLab allows two important limitations, applicable instantly to all the students:

- it locks / unlocks Internet access and closes instantly current connections,
- it locks programs of a black list easily compiled by the teacher.

It is also possible to lock the USB ports of students to prevent the connection of USB keys, mobile phones portable HDD.

LanguageLab is complete with 4 conversation courses of English, French, Spanish and German.
