

## Classroom Management Software

## MULTIMEDIA EDUCATIONAL SYSTEM

### Training software solution for fixed and mobile laboratories

**TeachLab** represents the ideal solution for all the laboratories for its reliability and ease of use.

- Monitoring of the entire class in a single view with thumbnails of each student desktop.
- The map can always be in view via an optional display.
- Watch, share and control the screen, keyboard, mouse and audio of any student workstation in the class.
- High quality audio communications, sampling at 48 kHz.
- Full audio functions (COM, ALL, LISTEN, CONF, GROUP).
- Show the content of teacher's screen on the class, movies and YouTube included, even via Wi-Fi up to 30 tablets.
- Use only LAN, not the Internet. Server not required.
- Roll Call function, which displays the student name below each thumbnail and keeps the list of names in a register.
- In the case of domain, the student's account name is automatically shown below his thumbnail.
- Quiz, chat, file transfer, messages, opening apps in the class.
- Black and White List of sites. Opening a website in the class.

TeachLab has twenty years of experience, started in hardware version and continued in software version also for language labs, continuously increasing the functions and improving ease of use.

**Continuous innovation !**

### Management of fixed and mobile labs with Windows PCs and tablets!

The teacher can:

- Impose a disciplined use of PCs, through the continuous monitoring of their screens.
- Show in real time the teacher's screen as it is, including movies and YouTube, in the students screens, superimposing the teacher's voice on the soundtrack for comments.
- Broadcast audio to the class or transmit the teacher's voice during a presentation.
- Capture a student's screen and correct him from teacher's desk, even sharing the student's screen with the whole class.
- Interrogate the students on the content of teacher's screen from their place, sharing screen/mouse/KB of the teacher (transfer of the chalk), also publicly.
- Gain attention of students blanking their screens.
- Open an application or an exercise to one, a group or all the students.
- Hand out and automatically collect files from one, a group or all students.
- Open selected web sites by Internet co-browse facility.
- Block/unblock on the fly the Internet access to one, a group or all the students.
- Make quiz with multiple choice, missing word or free text.
- When the Tutor application is minimised, a retractable toolbar is provided for quick access to main commands.
- Remotely Power On/Off and Log In/Log Off all classroom computers.

Minimum requirements: Win 7-8-10. Teacher: PC with processor Core2 Duo, student: tablet with processor Atom.
